

IT Support Contact Information

We have multiple options available to get in touch with us, please consider the following when requesting support.

Schedule work in advance when possible. For example, new hires, new equipment and training will be better supported when we are given advance notice.

Don't email or call/text employees directly unless already doing so for a specific issue, use the methods below so that new issues are seen as quickly as possible and documented properly.

Please communicate the priority and impact to the business so we can help you in the best way possible.

Call (603) 742-1118

- This is the best method if you need immediate support
- Great for complex issues that are difficult to explain in an email
- Typically, there is an answer by our receptionist between 9 and 5
- Receptionist is trained to get all details and get us the message
- If outside normal business hours leave a voicemail or email us

Email support@resolvetech.biz

- Use a short but descriptive subject
- Let us know if you prefer we call you back
- Tell us if we have permission to connect to your computer immediately
- You can attach a screenshot of an error message or additional detail
- A ticket will be automatically created in our support system and we will be alerted
